

Rose wood, acrylic and gold coating on metal (side panel and ball inside acrylic)

RANK 1 : by Rajsekaran

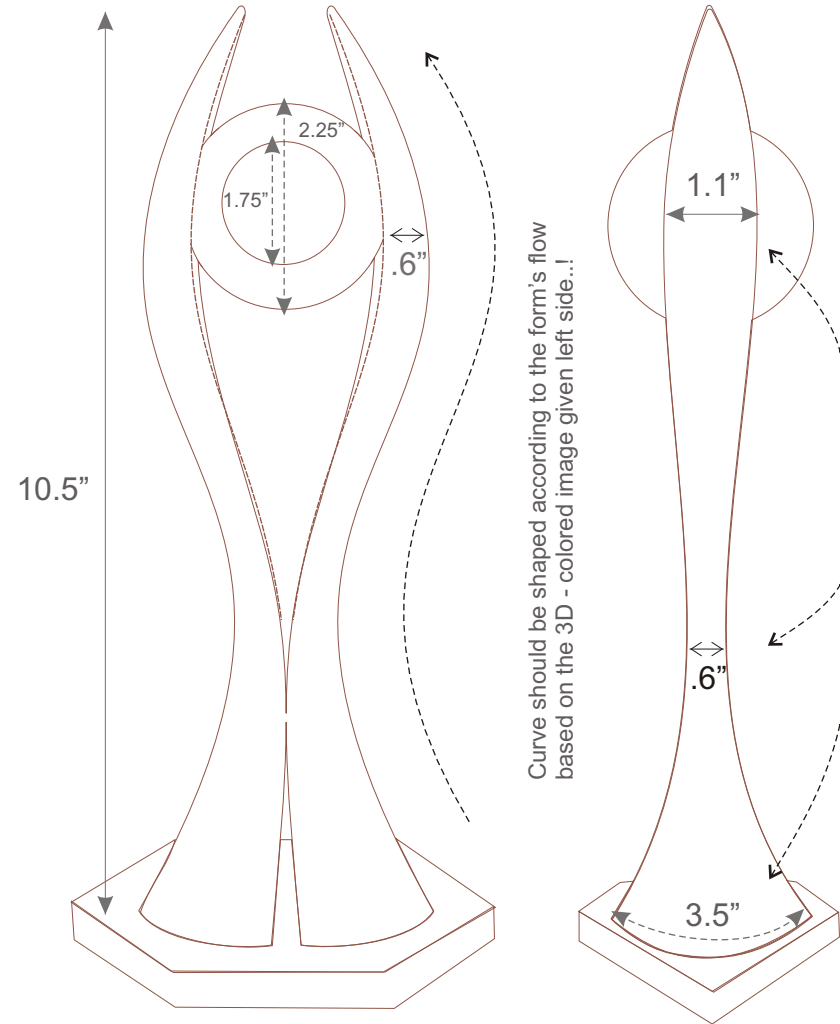

IMPORTANT

Since the form of the trophy is more depended on the **flow** given by the **craft person**, based on the design, the measurements **can be slightly changed** in order to achieve the better form and flow.. But, the main thing is the **given shape** should be achieved.

Width of the hand's curves are to be shaped according to the flow and the details of the image given left side...

Please provide smooth curve at top edge. No sharp edges.

Curve should be shaped according to the form's flow based on the 3D - colored image given left side..!

This part of hexagon and opposite side of this side should be bigger than other sides.

Measurements (height and width) of the Hexagon base can be decided according to the length of the message to be engraved

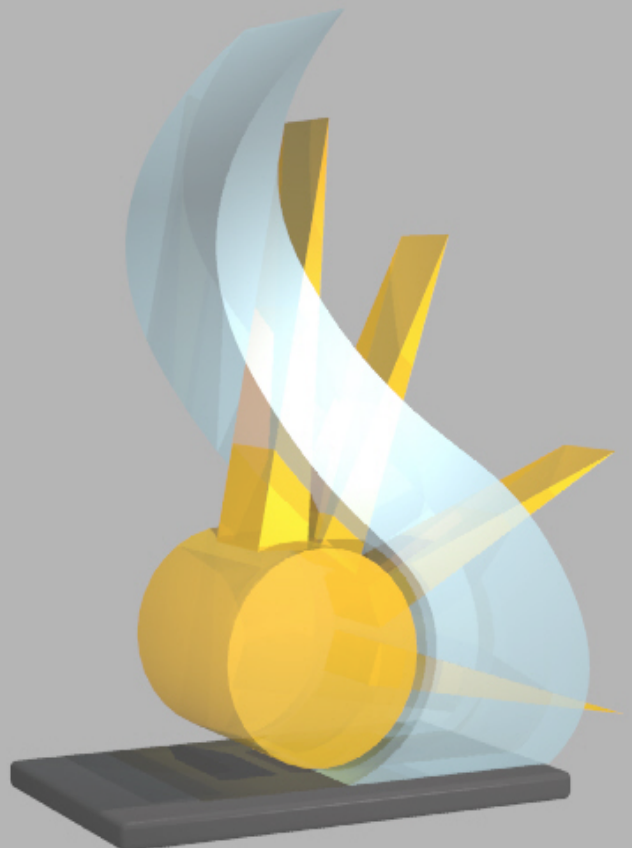

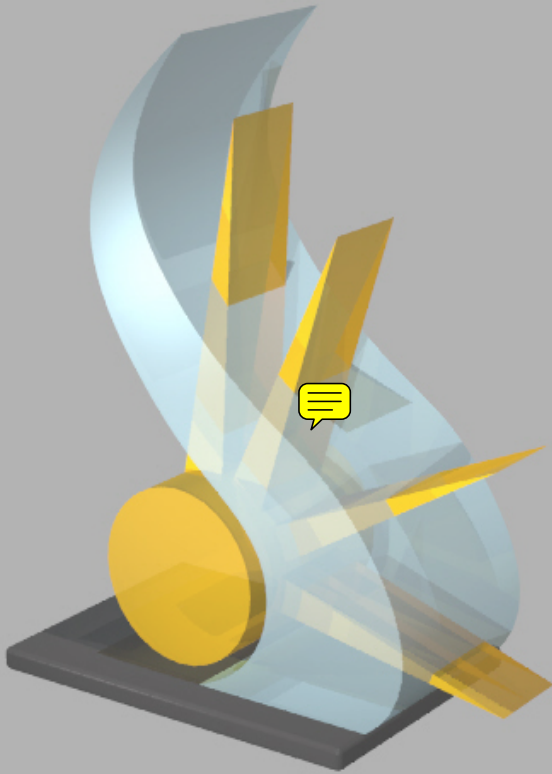

Since the form of the trophy is more depended on the **flow** given by the **craft person**, based on the design, the measurements **can be slightly changed** in order to achieve the better form and flow.. But, the main thing is the **given shape** should be achieved.

RANK 2: by Kunal Shah

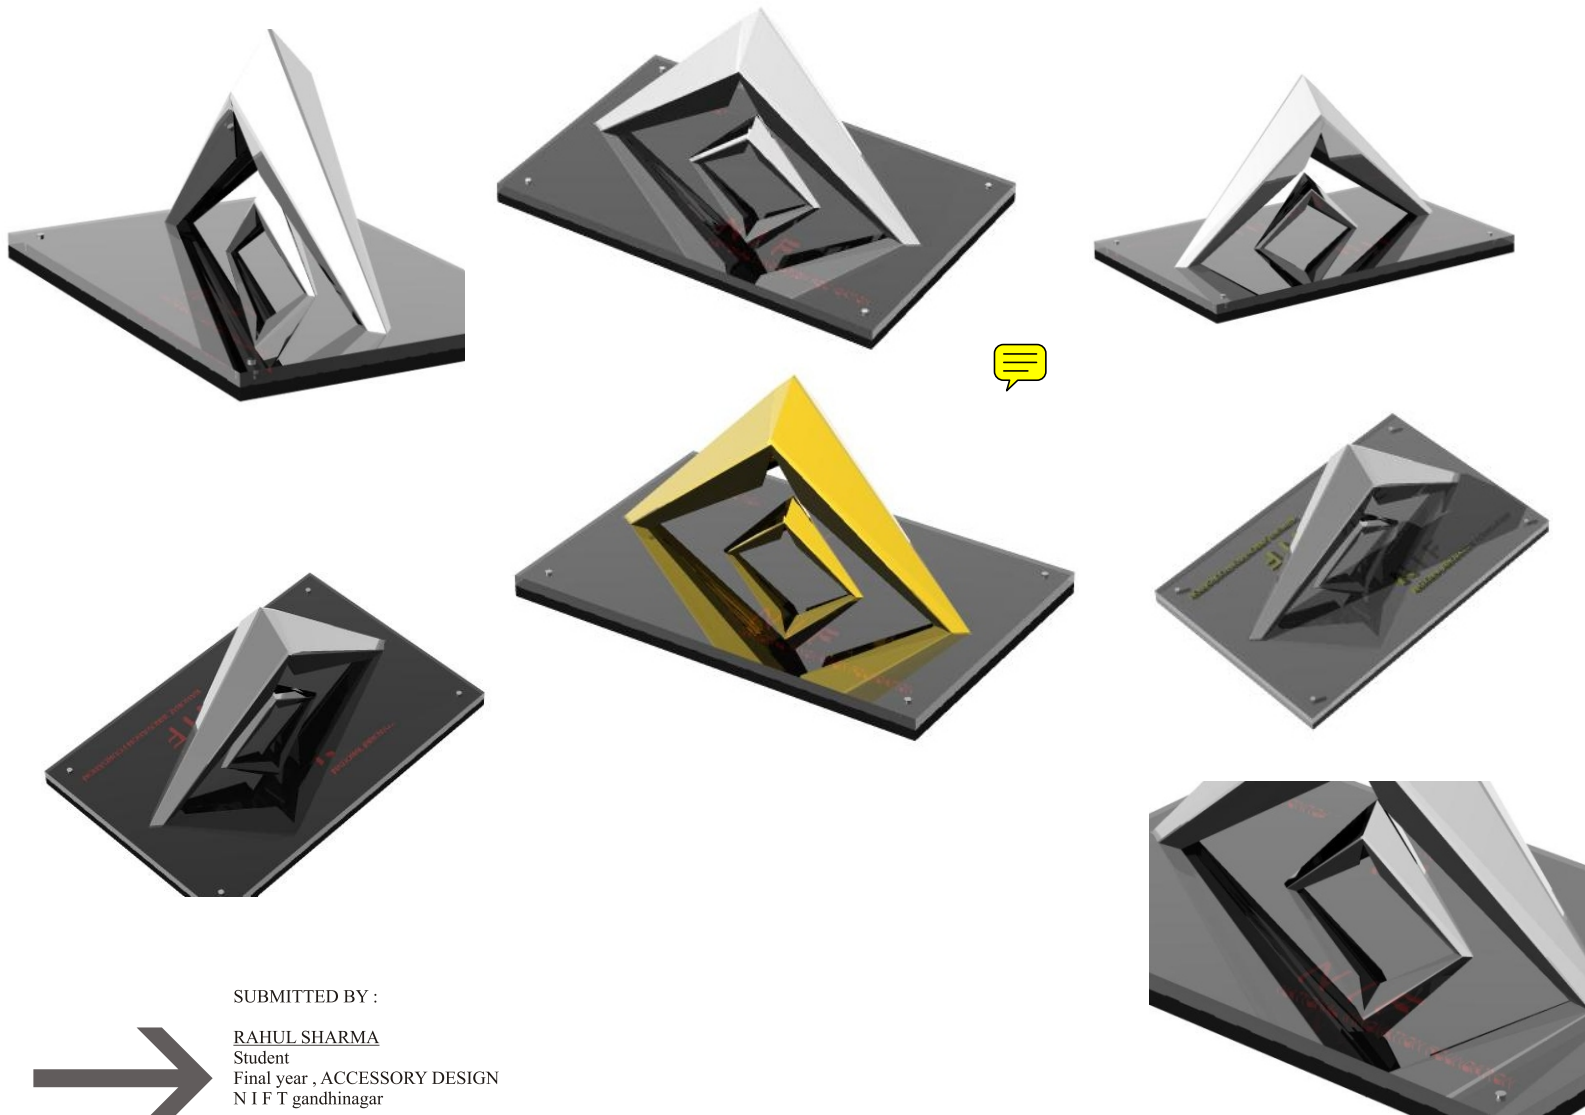

CONCEPT

The golden cylinder here indicates a source of energy and the transparent body represents the person.

This trophy is trying to convey that the person who is thinking on the grass root levels of innovation has the potential to absorb and reflect the energy and travel along the path which leads to success. It also reflects the uniqueness and transparency in the thought proces.
